April 2010

Everyone feels the excitement of the SPRING AIR. The expression "Spring Fever" actually exists. Here are some tips for your spring makeover.

Women's hair fashion forecast for spring:

Transcending trends that have no reference to the past yet gives a view to the future. Stomping down the runways we see strong symmetrical and asymmetrical designs that give the illusion of sexy hair that is wearable, simple and modern. Whether short or long, blunt cut edges reflect a strong silhouette. Escaping layers, hair is strong and bold, daringly short or strikingly long. Of course this is fashion week, now for the rest of us, try to follow your personality and wear what feels good to you. Always keep in mind your facial shape and stick to a design that compliments your bone structure.

Remember, bob hair designs add roundness and are not recommended for full faces, shag or layered designs elongate your shape and tapers around the face compliment your bone structure. Also, small faces should have less hair to prevent overpowering your face.

Going up with it? Loose buns and ponytails are hot, red lips, extended eye lashes and a fake bronze tan to finish your look!

Women's spring wardrobe – THE MOOD is creative and fun with little white dresses, inner wear becomes outer wear with shear tops, military inspired jackets, trench wraps, cream puff dresses, shorts appropriate for office, toffee-colored skins, black and white evening wear, sci-fi prints, transparent accessories, sexy hi heeled clogs, yes... sexy.

Men are sporting traffic stopping hair trendz with the whole "metro sexual look". It's actually COOL for men to be "in fashion" and show off style. The new craze, men with an independent spirit and enjoying salon services; manicures, pedicures, hair color, the ever popular gray blending color just for MEN and hi lights. Many product companies have an entire line just for MEN. So RELAX and be pampered guys you deserve it!! Spring style trends show textured hair designs that break up the shape and add volume, high and tight with a GQ longer bang, the emo look with a longer, shaggy razor cut slightly covering the eyes, and the every popular clean cut business look. Men are looking for something different and do not know how to achieve it with short hair. It's simple! Simply bust up the shape with free hand texture to create character to your design. A straight square cut is boring. Add detail with

longer side burns and a longer bang. Style the shape with paste for MEN and not brush your hair. Use your hands to put it into place. You will still look totally professional, just a little more detailed.

Men's spring wardrobe – THE LOOK is mismatched pieces and styles that look a little worn, defined shoulders and slim waists, patterned ties, crisp suits with pale colors, new wave boat shoe with splashy colors, ripped ragged jeans, designer eye wear and slick hair. Remember, fashion is an expression of "you" – always be yourself and wear it well!! Until next time,

Your Friend,
